

# Med smarta hus möter fastighetsbranschen Industri 4.0

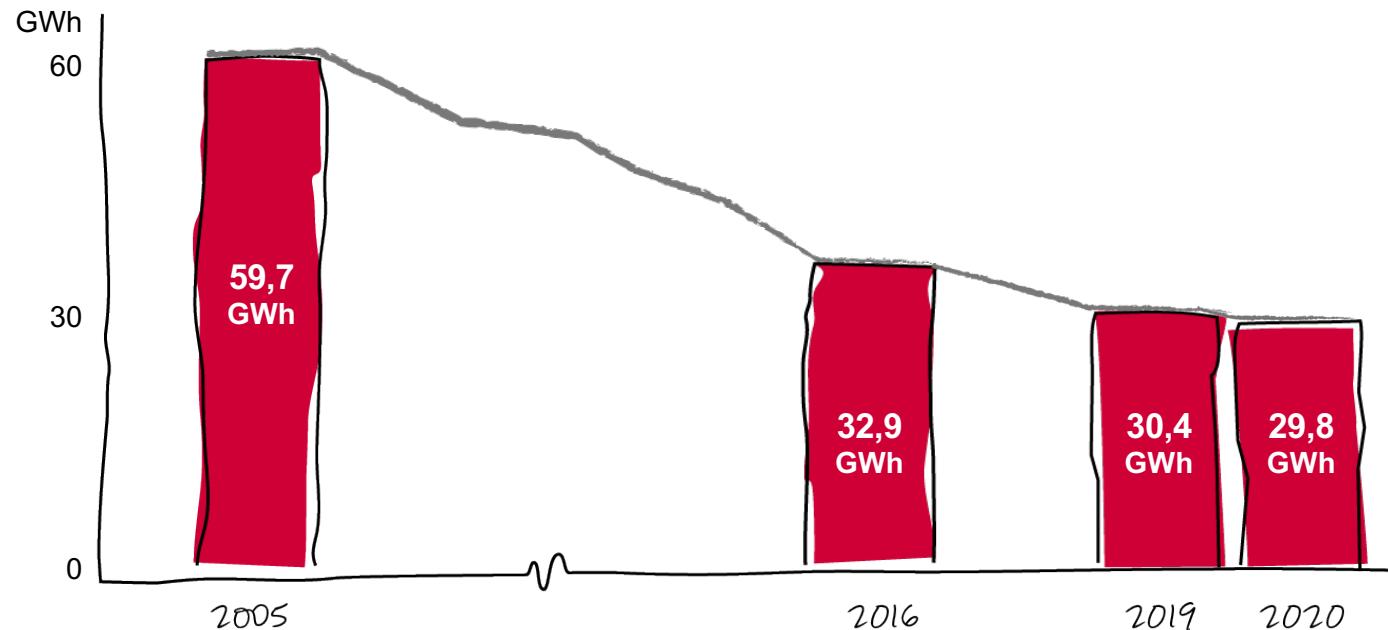

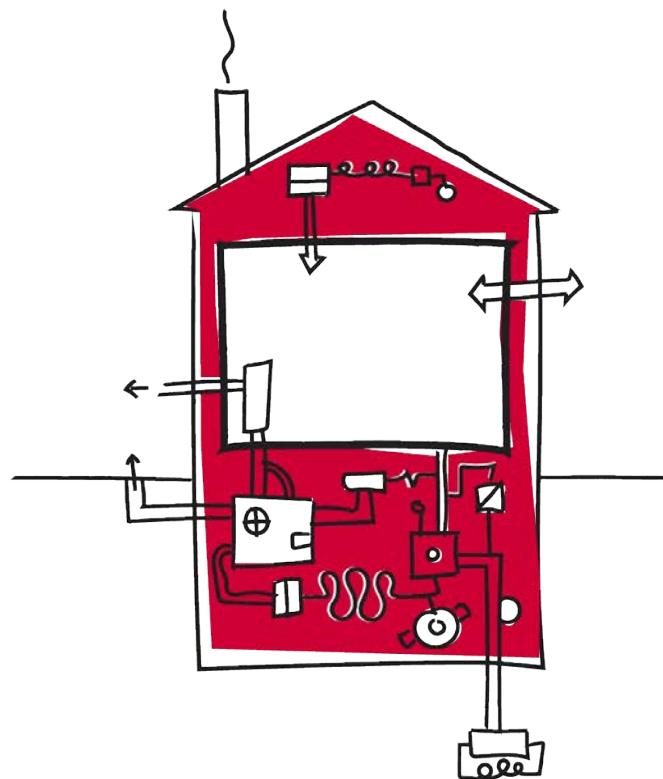

BIM Alliance frukostmöte - 210113

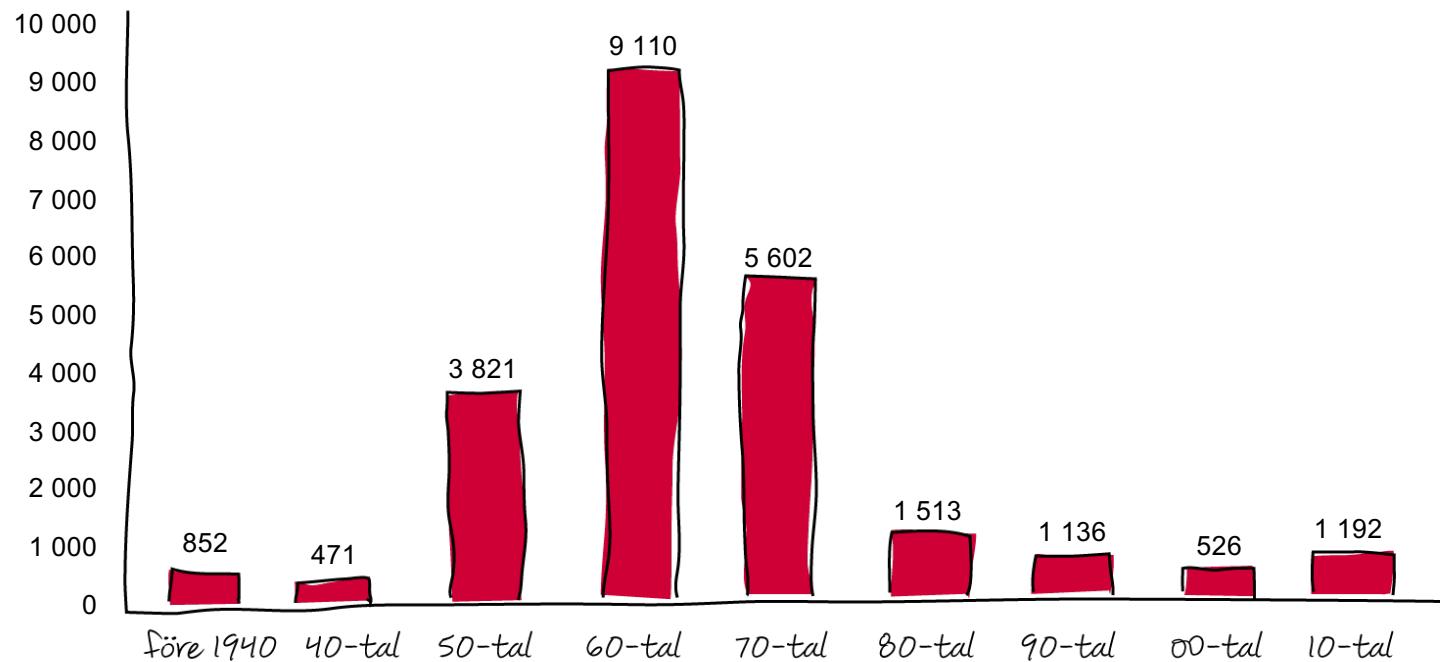

UNIVERSITÄT DARMSTADT INGENIEURSFAKULTÄT

## Elförbrukning

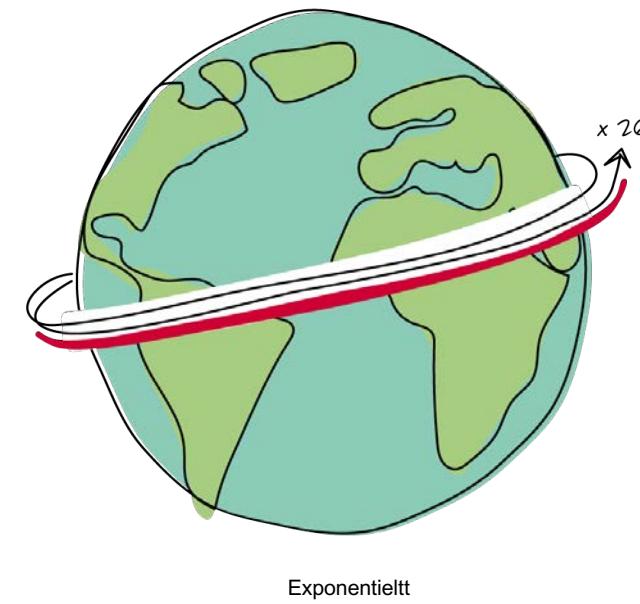

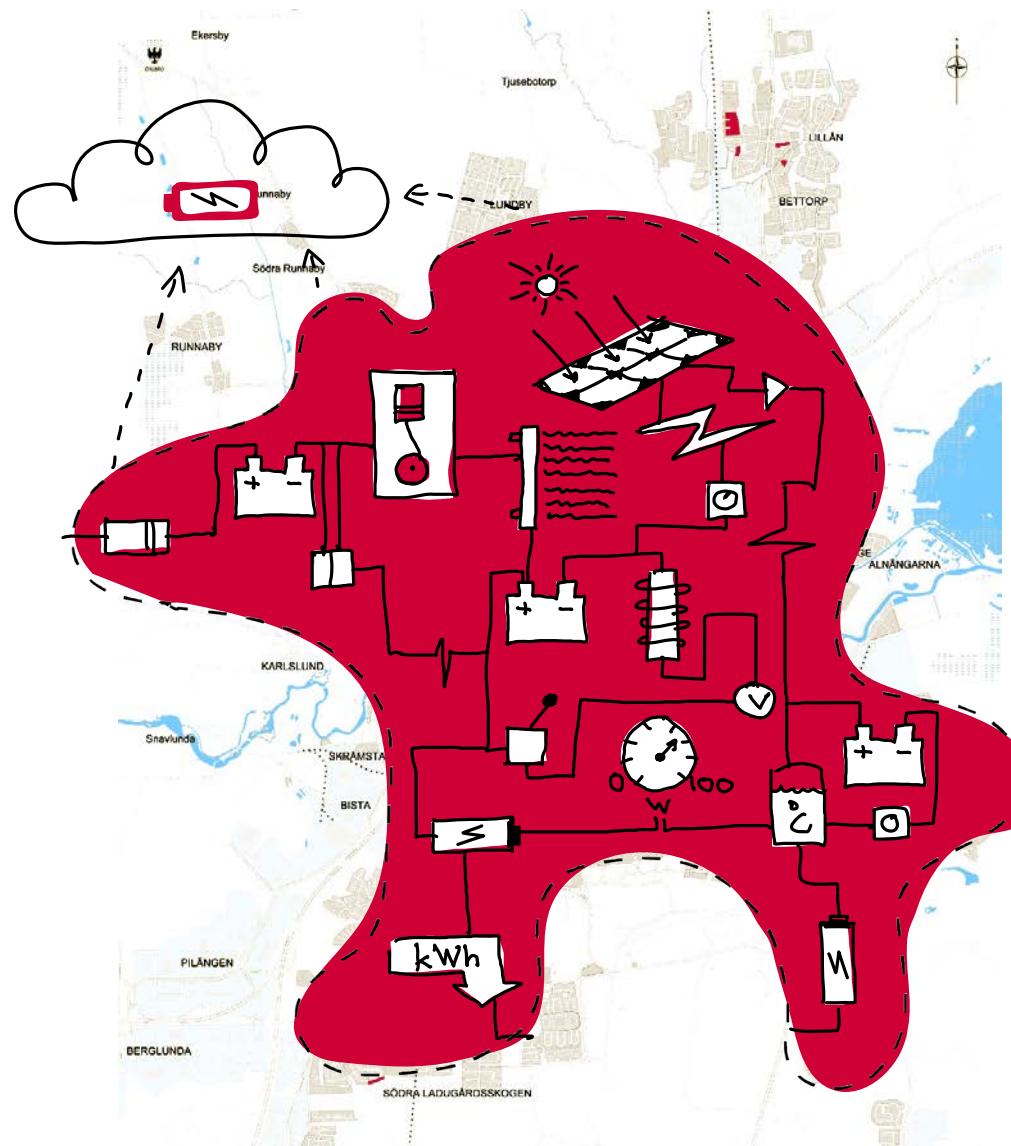

## Byggår

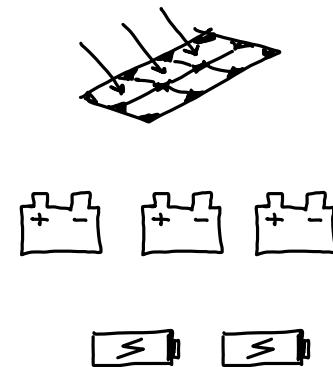

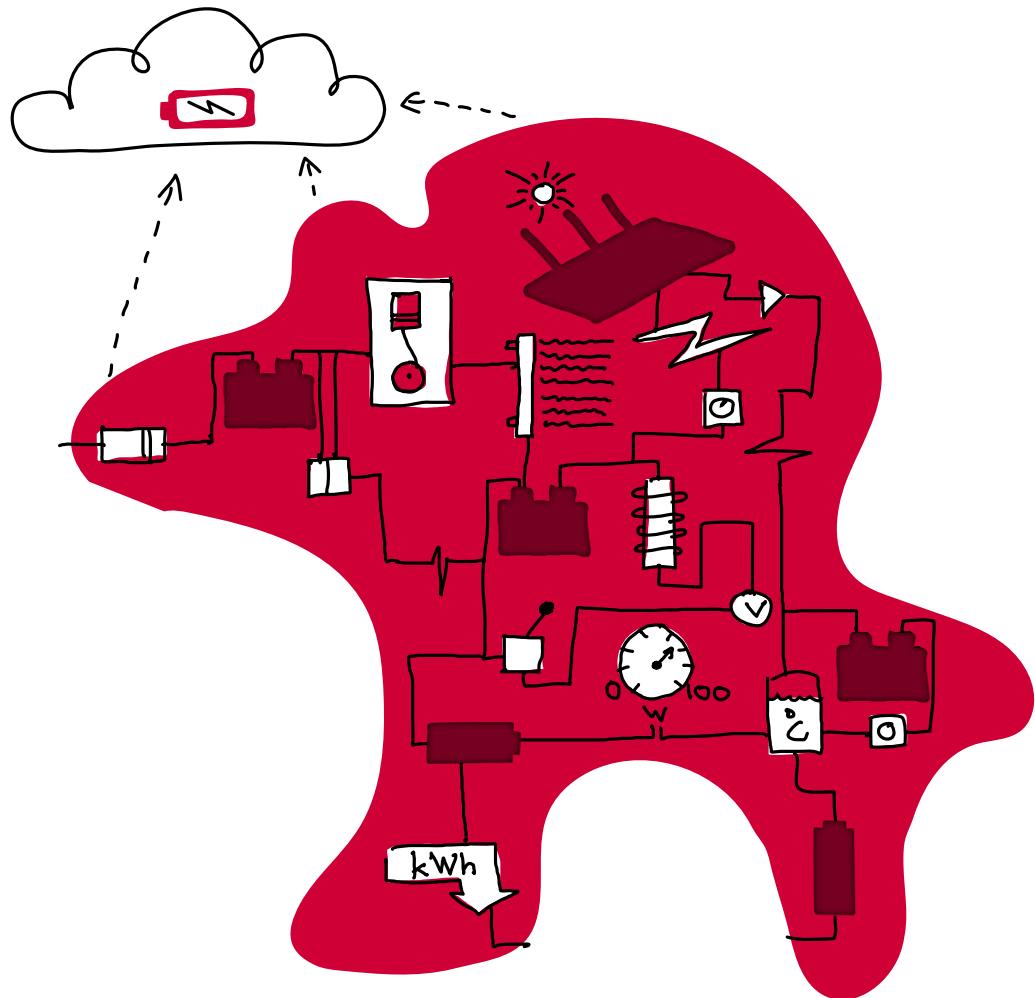

## Energimarknaden i en snabb omställning

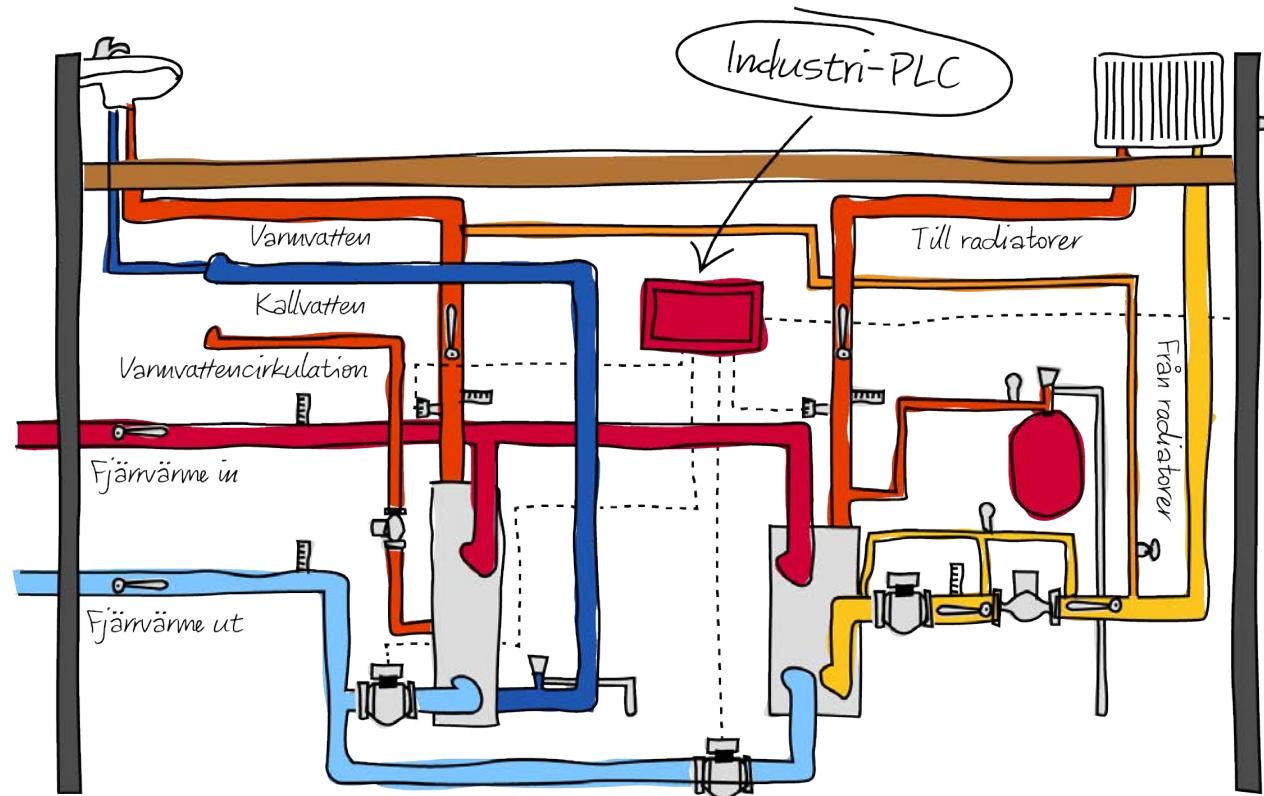

- Fastighets - och energibranschen interagerar på nya sätt som skapar utrymme för innovation
- Energikostnader kommer framöver ändras på ett mer oförutsägbart sätt
- Energilagring är en form av disruptiv teknologi för både fastighets –och energibranschen

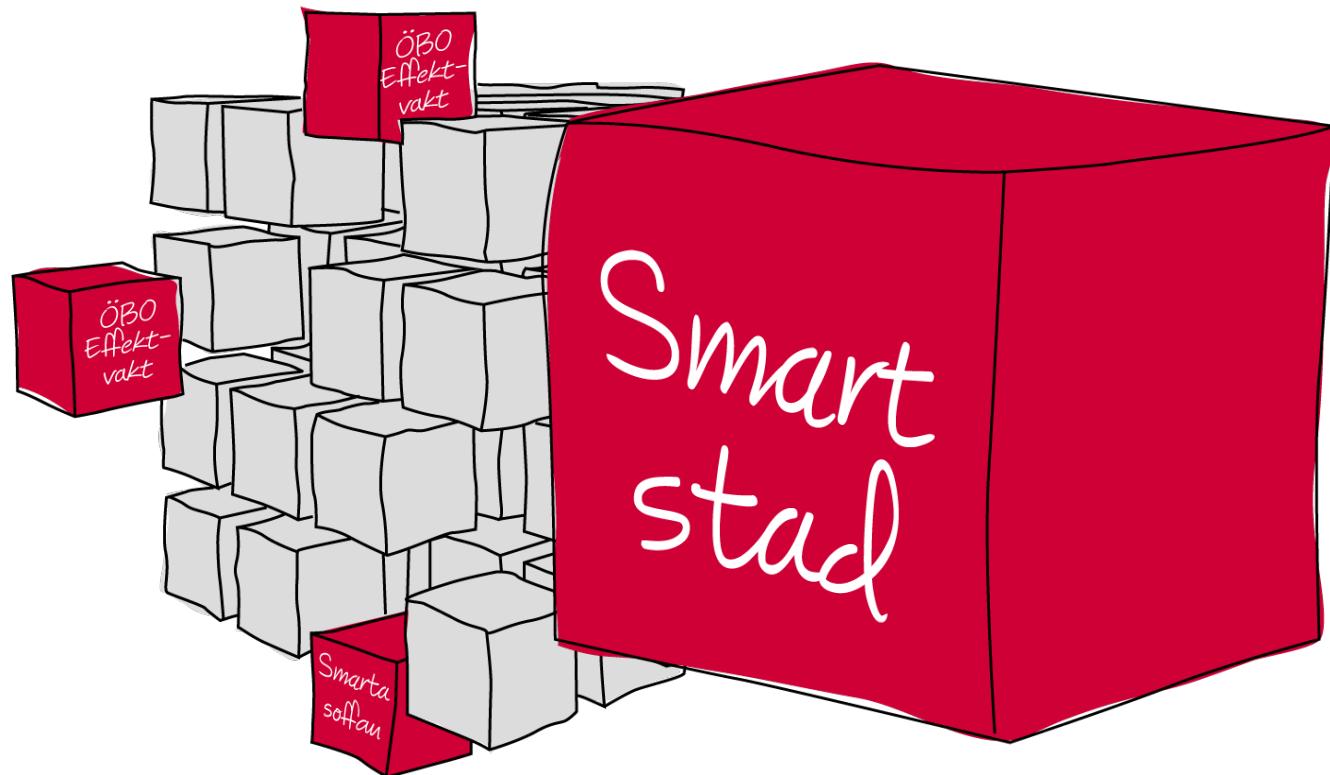

## Industriell automation

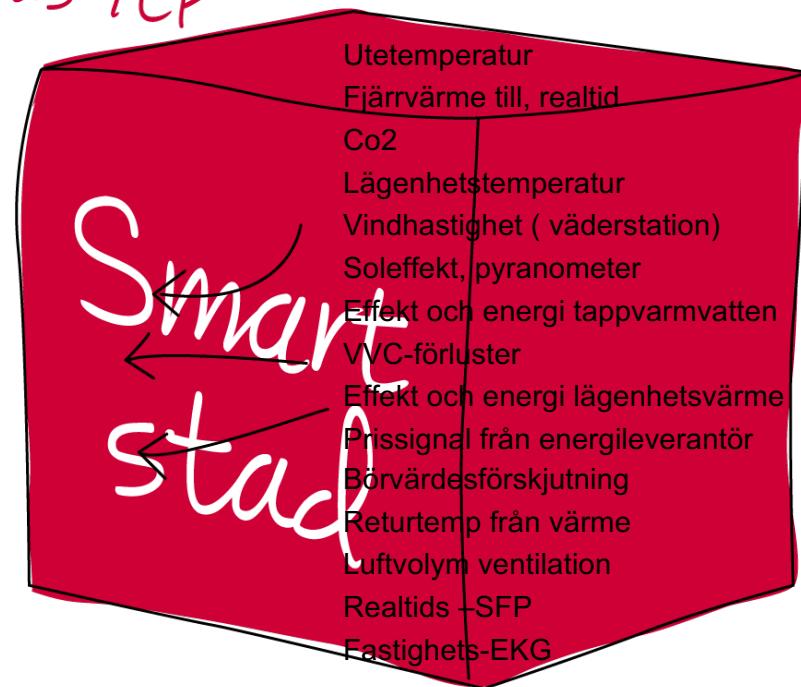

IEC 61131-3

Smart stad

Webbservice

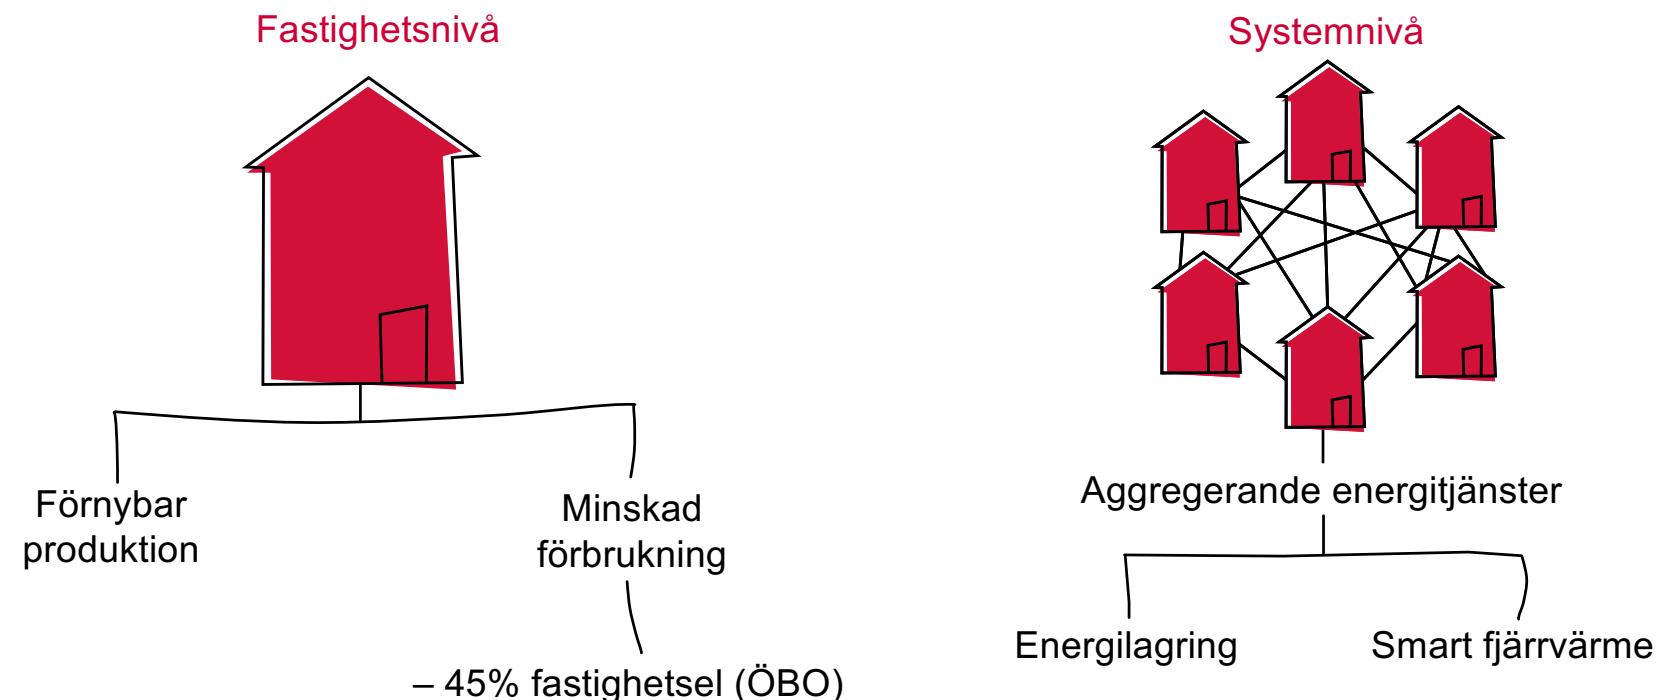

Modbus TCP

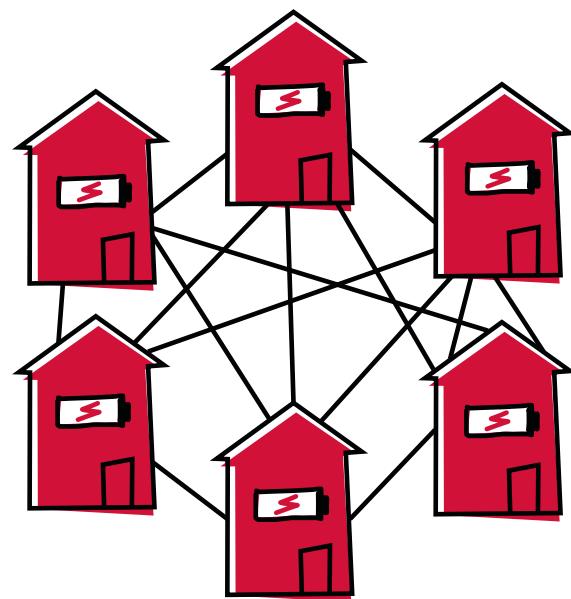

## Breakdown of data sources

Facilities	Environment	Tenants	
Heating systems	Ventilation	Weather station	Apartments
<ul style="list-style-type: none"> <li>• Heating primary (own production), pulse metering energy</li> <li>• Heating primary (own production), pulse metering volume</li> <li>• Cold water, pulse flow</li> <li>• Cold water, pulse flow <ul style="list-style-type: none"> <li>• Warm water</li> </ul> </li> <li>• Temperature outside</li> <li>• Heating primary (own production)</li> <li>• Heating primary (own production)</li> <li>• Secondary heating, outgoing temp.</li> <li>• Secondary Heating, return temp.</li> <li>• Secondary Heating, outgoing temp.</li> <li>• Secondary Heating, return temp.</li> <li>• Warm water, outgoing temp. <ul style="list-style-type: none"> <li>• Hot water return temperature</li> </ul> </li> <li>• Cold water, temperature, outgoing</li> <li>• Secondary Heating, return temperature</li> <li>• Secondary Heating, return temperature</li> </ul>	<ul style="list-style-type: none"> <li>• Temperature incoming air</li> <li>• Temperature outgoing air</li> <li>• Temperature exhaust air <ul style="list-style-type: none"> <li>• Temperature room</li> </ul> </li> <li>• Pressure incoming air</li> <li>• Pressure outgoing air <ul style="list-style-type: none"> <li>• Flow incoming air</li> <li>• Flow outgoing air</li> </ul> </li> <li>• Pressure difference outdoor filter</li> <li>• Pressure difference outgoing air</li> <li>• Electrical consumption incoming fan</li> <li>• Electrical consumption Outgoing fan</li> <li>• Electrical consumption heating battery (usually 2-6 kW)</li> <li>• Control signal to built in thyristor for heating battery <ul style="list-style-type: none"> <li>• 0 – 10 VDC signal corresponding to actual airflow</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Electricity metering ventilation system</li> <li>• Electricity metering washing room*</li> <li>• Electricity metering lights (not apartments)</li> <li>• Electricity metering elevator</li> </ul>	<ul style="list-style-type: none"> <li>• Effective outdoor temperature <ul style="list-style-type: none"> <li>• Wind direction</li> <li>• Wind speed</li> </ul> </li> <li>• Outdoor temperature <ul style="list-style-type: none"> <li>• Humidity</li> </ul> </li> <li>• Barometric pressure <ul style="list-style-type: none"> <li>• Rain intensity</li> <li>• Hail intensity</li> <li>• Sun power</li> </ul> </li> <li>• Solar radiation power <ul style="list-style-type: none"> <li>• Light intensity</li> </ul> </li> <li>• Forecast outdoor temp</li> <li>• Forecast outdoor temp. + 1 h</li> <li>• Forecast outdoor temp. + 2 h</li> <li>• Forecast outdoor temp. + 3 h</li> <li>• Forecast outdoor temp. + 4 h</li> <li>• Forecast outdoor temp. + 5 h</li> </ul>

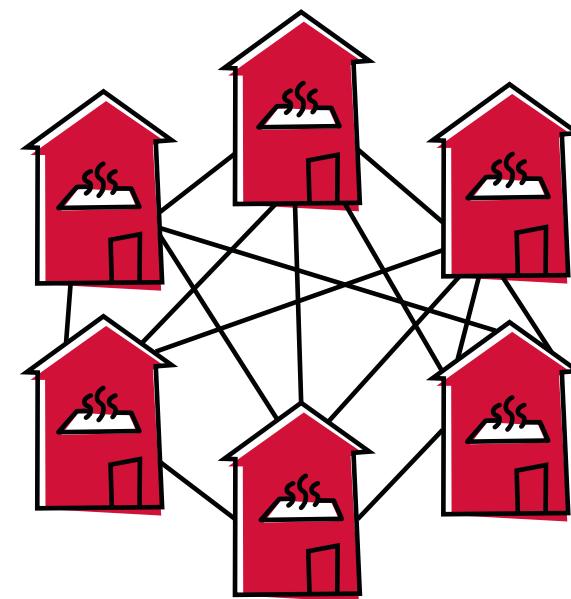

## Hur kan fastigheter bidra till att skapa ett hållbart energisystem?

## Energilagring

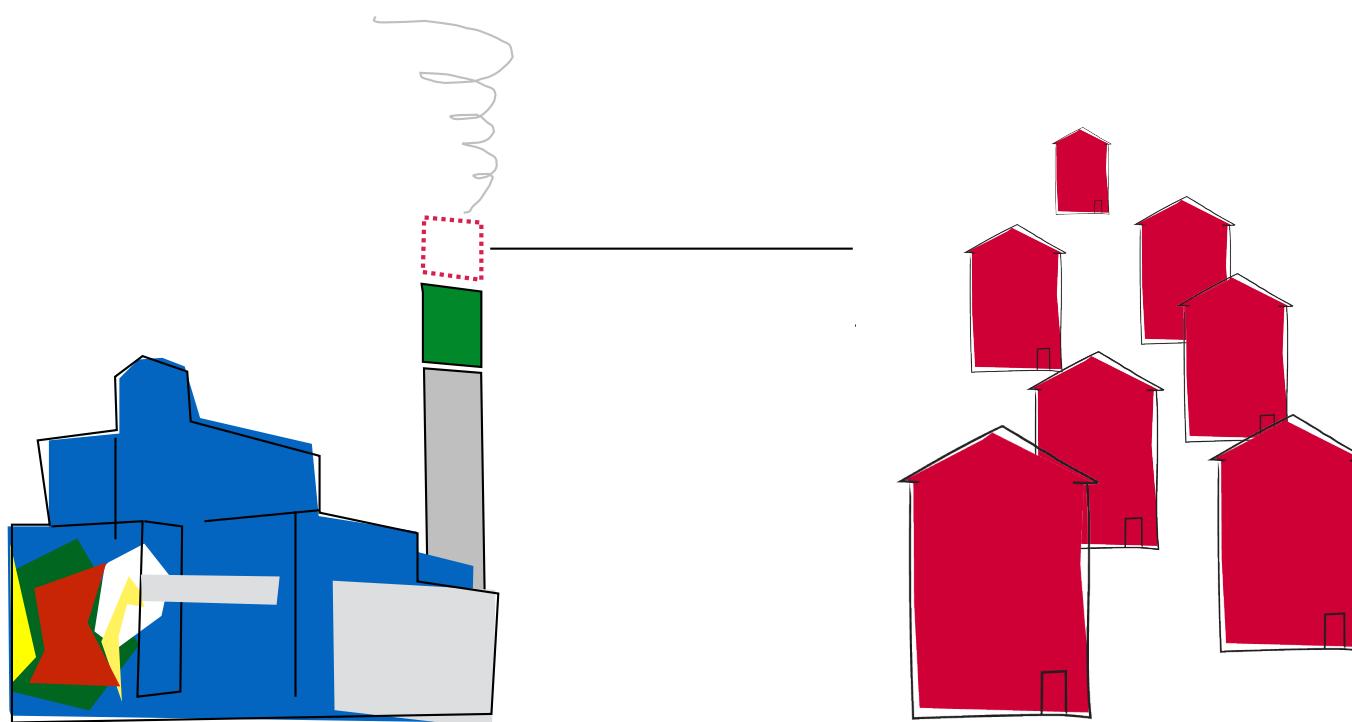

## Smart fjärrvärme

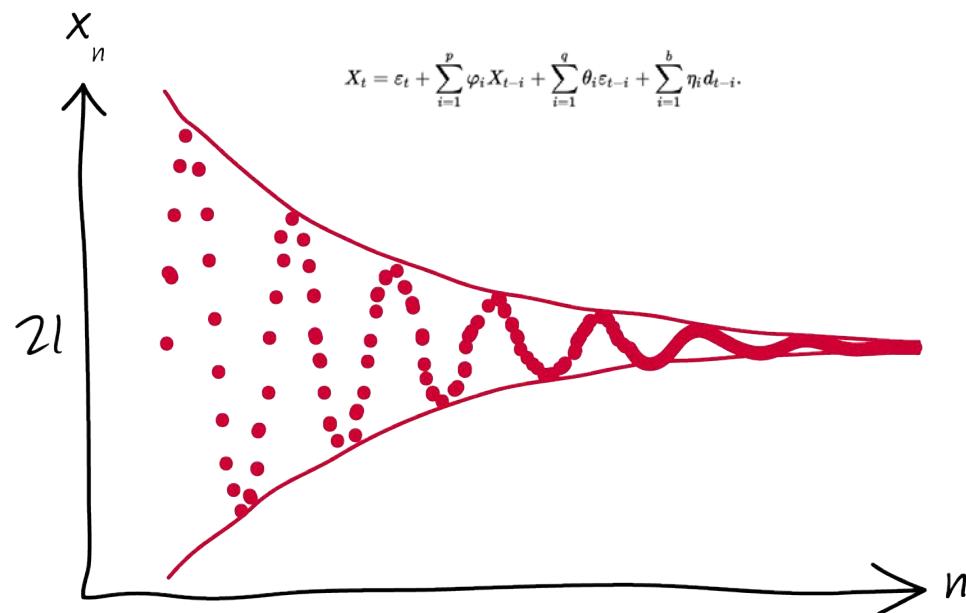

ÖBO kapar effektbehovstoparna

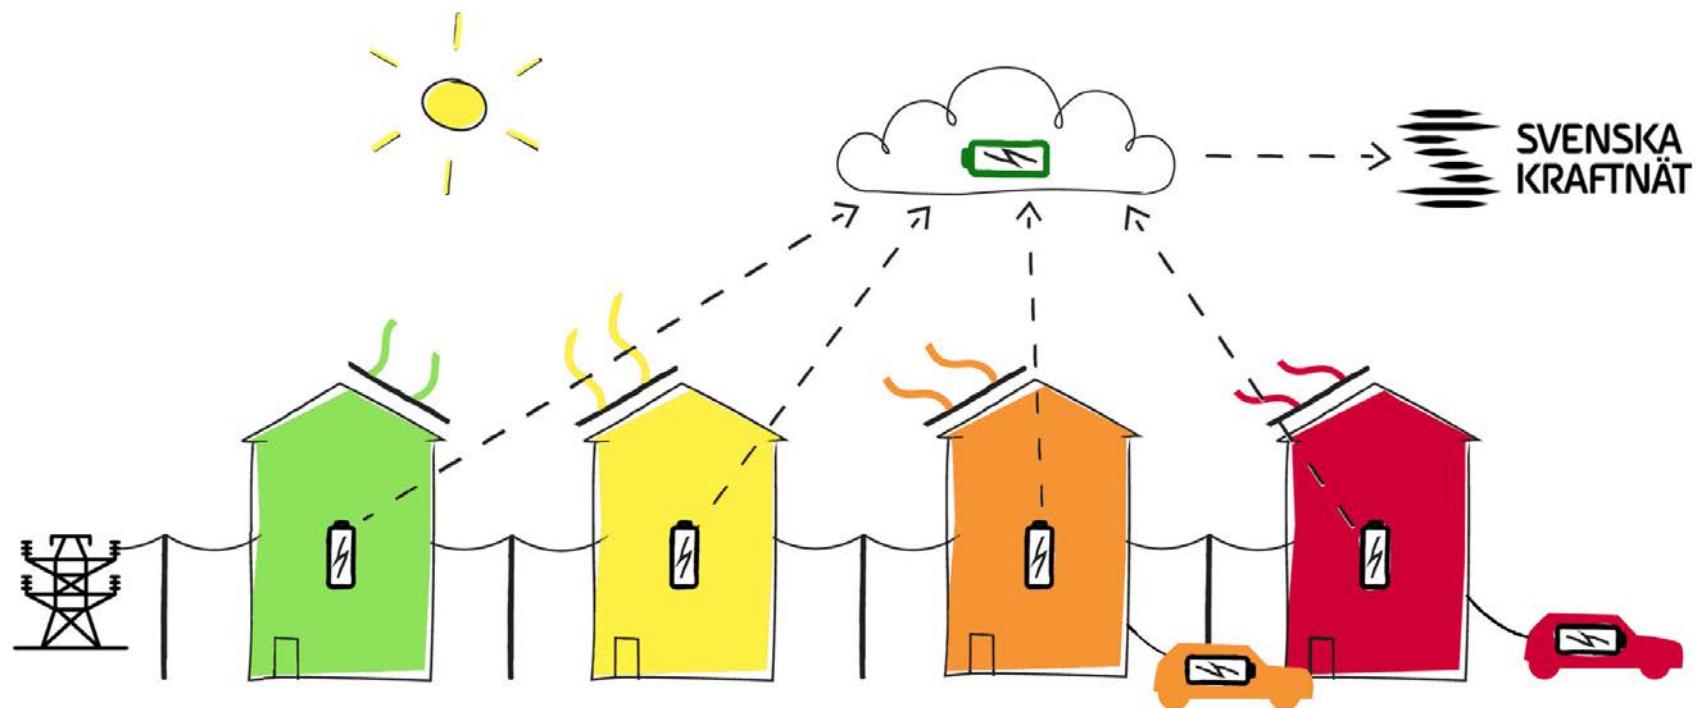

## Ny styrstrategi

ÖBo  
Hem för dig

Tamarinden

öBo  
Hem för dig

## Smartstäder steg för steg

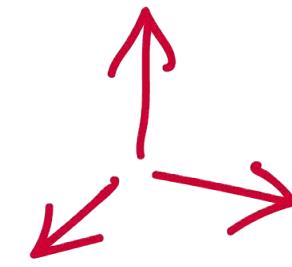

### Steg 1 – minska

- Energieffektivisering
- Smart automation och kontroll av fastigheters tekniska system
- Dataanalys

### Steg 2 – producera

- Lokal energiproduktion och energilagring
- Smart laddinfrastruktur för elbilar

### Steg 3 – dela

- Sammanslagning av energitillgångar
- Marknadsplats för P2P (person till person) – ny delningsekonomi för energi
- Frekvenskontroll m m
