📍 ⓘ High-level View ▾

Use this section to provide a high-level overview of the project context.

Keep in Mind: openBIM is not only about the use of solutions. openBIM is about setting up an environment where every party in a team can work in the optimal way ("how they prefer") without putting limitations on others. It is about freedom to take control over your data and workflows, while keeping that freedom for others as well. Full use of open standards is not mandatory for this mission.

Note: Use the Attachments Tab to upload attachments, such as images, screenshots, documents, and videos.
